Auto/Mate's time clock solution makes processing payroll at the end of the pay period a breeze.

Product Description

Time/Mate is included when you purchase Payroll and performs with all the same functionality as a third-party solution at a more reasonable price. All hourly punched time seamlessly flows into Payroll, and reports show regular, double and overtime. Managers can also access the reports for a department-bydepartment view. Employees can easily punch in and out, as well as review all their time punches by accessing Time/Mate right in their taskbar.

How Time/Mate can help your dealership:

- More functionality and better support than a third party
- Save time and streamline payroll workflow in the dealership
- Make punch times only visible to the employee and Payroll

More functionality and better support than a third party

Time/Mate is a perfect substitute for overpriced third-party payroll products. Why spend your precious time waiting on hold for support when you can have the phone picked up by somebody with years of actual dealership experience?

Save time and streamline payroll workflow in the dealership

All time is recorded digitally, which means you can finally say goodbye to all the wasted time reviewing manual punches. Now, when there's a discrepancy in time punches or need to reference the pay period from last month, you can easily and conveniently search for the archived PDF report.

Review appointment details with your customers

Present appointment details to customers such as services being performed, dealership disclaimers and customer information. Make edits as needed and allow customers to approve or decline services.

Make punch times only visible to the employee and Payroll

The new private mode feature in Time/Mate gives you the option of allowing users to clock in and out with their user credentials, rather than their information. This prevents other employees in the dealership from viewing a list of all users and their punch status and time, as well as gives your employees a sense of privacy.
